

LOADING GUIDE **BLOCKING**

Blocking is where you place a load against a body structure or attachment to prevent movement. Blocking can be used in the tie down or direct restraint methods. Some useful tips are:

- ✓ Use rated equipment
- ✓ Barriers have limited capacity
- ✓ Limit any gaps where possible
- ✓ Place tall loads against structures
- ✓ Do not use tarps or unrated curtains.

⚠️ RISKS

⚠️ UNSTABLE LOADS

⚠️ EXCESSIVE FORWARDS MOVEMENT

⚠️ EXCESSIVE SIDWAYS MOVEMENT

⚠️ GAPS BETWEEN BARRIER AND LOAD

✓ GOOD PRACTICE

✓ BRACED AGAINST HEADBOARD

✓ LIMIT GAPS

✓ BLOCKED WITH PALLETS

✓ MOVE LOAD TO BARRIER
