

LOADING GUIDE **LIVE LOADS**

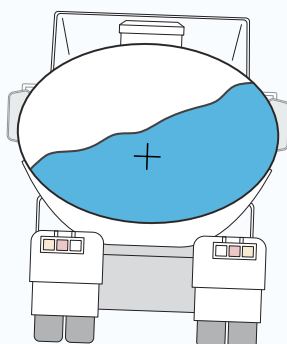

Live Loads are loads that can be expected to move when being transported. This includes bulk liquids, livestock, hanging meat, wet concrete, motor vehicles and large rubber-tyred equipment.

- ✓ Understand how a live load might behave during transport
- ✓ Maintaining steady acceleration and braking
- ✓ Take wider and slower turns
- ✓ Minimise sudden movements that may cause the load to move excessively
- ✓ Avoid clipping gutters and roundabouts and take care on negative camber roads, such as roundabouts.

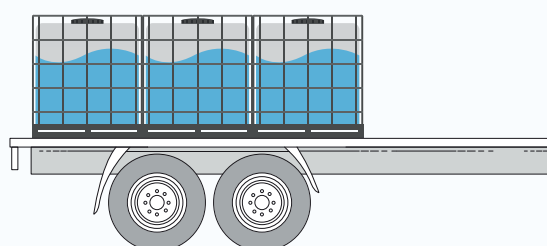

RISKS

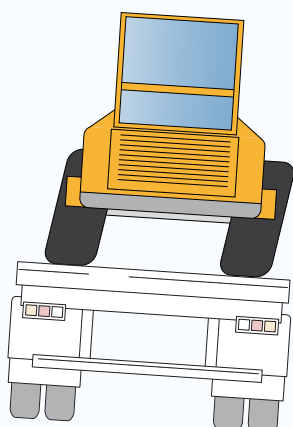

NO BAFFLES

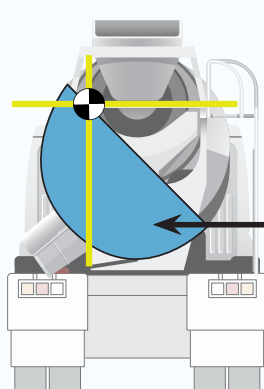

PARTIALLY FILLED IBC'S

TYRE SWAY

HIGH CORNER SPEED

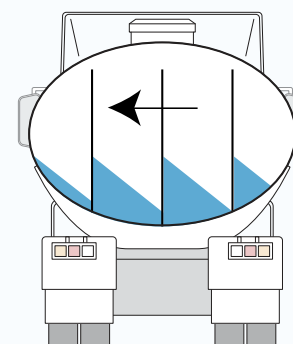

WET CONCRETE

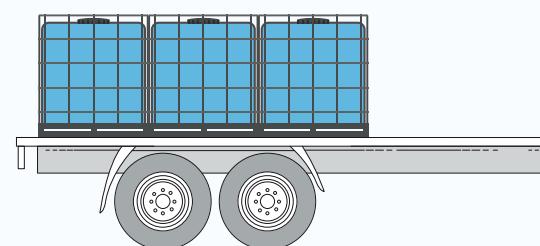

GOOD PRACTICE

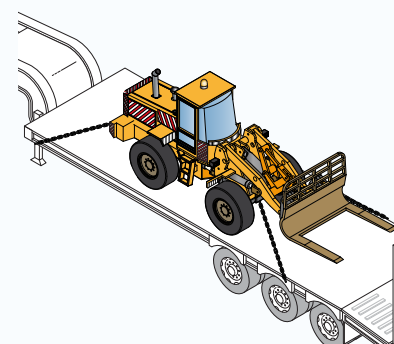

✓ **BAFFLES INSTALLED**

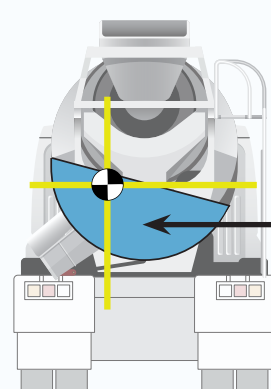

✓ **COMPLETELY FILLED IBC'S**

✓ **DIRECTLY RESTRAIN**

✓ **LOWER CORNER SPEED**

WET CONCRETE
