

Setting the Agenda - Strategies for a Safer, Productive and more Compliant Heavy Vehicle Industry

Focus Areas		Priority Actions 2016-17
Safety		
One Safety Regulator	<ul style="list-style-type: none"> National regulatory safety program Safety promotions, training and education Regulatory reform program HV incident/investigation evidence based decisions 	<ul style="list-style-type: none"> Undertake a regulatory needs analysis Plan and develop a national regulatory safety program Plan and develop a national incident reporting framework Establish a process for monitoring emerging technologies and safety related trends
Safety Partnerships	<ul style="list-style-type: none"> Joint safety programs Inform, educate and enable 	<ul style="list-style-type: none"> Baseline industry safety awareness Develop and deliver a national heavy vehicle awareness road safety program Continue development of a voluntary electronic work diary system Develop a program to recognise safety best practice
Safety Standards	<ul style="list-style-type: none"> Standards for entry and continued operation in the HV industry Risk and Safety Management Systems 	<ul style="list-style-type: none"> Develop and deliver guidance and education in relation to Safety Management Systems (SMS) Develop regulatory units of competency for transport fatigue risk management Review existing accreditation/certification standards associated with heavy vehicles
Safety Data and Technology	<ul style="list-style-type: none"> Single national source of heavy vehicle safety data Analysis and provision of safety critical information Research and development capability Utilisation of safety technologies 	<ul style="list-style-type: none"> Develop a safety risk management framework Develop data sets to support risk and evidence based decision making Continue the National Heavy Vehicle Roadworthiness Program
Compliance and Assurance		
Education	<ul style="list-style-type: none"> Regulatory responsibilities including CoR Education and guidance Nationally consistent compliance and assurance capabilities 	<ul style="list-style-type: none"> Publish and implement guidelines for the registration of Codes of Practice Develop and deliver guidance and education material including CoR Develop units of competency for investigator and authorised officer training
Assurance	<ul style="list-style-type: none"> Consistent and effective compliance and assurance Integrated national HV monitoring network On-road compliance checks and CoR investigations Evidence-based decision making 	<ul style="list-style-type: none"> Plan and develop a national compliance and assurance framework Initiate the development of a national compliance operations manual and associated national standards Finalise the proposal for the National Compliance Information System and camera network Fast track installation of additional camera sites in support of the National Compliance Information System
Intervention	<ul style="list-style-type: none"> National consistency Intelligence-driven intervention and enforcement High-risk behaviours and systemic offending 	<ul style="list-style-type: none"> Develop national investigations and interventions manuals Develop NHVR capacity to investigate and prosecute serious and complex Chain of Responsibility and other offences
Improvement	<ul style="list-style-type: none"> Harmonised operational policies National safety, compliance and assurance data Intelligence-driven decision making Innovative fleet technologies 	<ul style="list-style-type: none"> Implement the Memorandum of Understanding for information exchange Assess the national heavy vehicle compliance intelligence capability Encourage operators to adopt technologies and best practice in risk management practices
Productivity		
Consistent productivity standards	<ul style="list-style-type: none"> Nationally consistent standards Consistent risk-based decision-making guidelines Streamlined administrative procedures Clear and consistent national framework 	<ul style="list-style-type: none"> Plan and develop a national heavy vehicle classification system Develop and implement a national access management framework Promote and streamline access to Performance Based Standards scheme vehicles and networks
Productivity data and technology	<ul style="list-style-type: none"> National access management system Consistent regulatory framework Increased uptake of innovative technologies 	<ul style="list-style-type: none"> Plan and develop a national information strategy and system Implement the NHVR Customer Portal Continue to progress a national harmonisation plan
Productivity partnerships	<ul style="list-style-type: none"> Effective national access management framework Increased access for high-productivity vehicles Reduce permits for low-risk vehicles Timely access decision making 	<ul style="list-style-type: none"> Develop road manager and industry decision making tools Plan and develop a national intelligent transport systems framework for heavy vehicles
