(4) The sum of the mass on each of the combination’s single axles and axle groups must not exceed the sum of the mass limits specified for each of them in Table 1.

(5) In addition, the total mass of the combination and any load must not exceed:

(a) 49.5 tonnes if the distance between the centre-line of the rearmost axle of the towing vehicle and the centre-line of the foremost axle of the combination’s rear axle group is 6 m or more, or

(b) 49.5 tonnes decreased by 1 tonne for every 0.3 m by which the distance referred to in paragraph (a) is less than 6 m.

(6) The mass on an axle group or single axle must not exceed the relevant limit set by Schedule 1 to the Regulation if it is:

(a) not described in Table 1; or

(b) on a load-carrying vehicle or combination except one described in clause (2) above.

12 Conditions – Conditional Masses (Tyre Widths)

(1) In order to travel at the mass limits identified in Table 2, the applicable tyre width limits in Table 2 and Table 3 must be met.

(2) Notwithstanding axle mass limits set out in Table 2 and Table 3, the steer axle mass must not exceed the steer axle mass set out in Table 1.

(3) The mass on an axle fitted with tyres of a number and width described in Table 2 must not exceed the mass limit specified in the Table for that axle in relation to the narrowest tyre on the axle.

Note: If a load can be safely loaded in more than one way, it must be loaded in a way that minimises the width of the vehicle or combination and its load.

(3) An unladen low loader, low loader dolly or jinker, with 4 tyres on each axle, must not be wider than 2.5 m.

(4) An unladen low loader, low loader dolly or jinker, with 8 tyres on each axle, must not be wider than 2.7 m.
14 Exemption – Vehicle Standards
