

Voluntary exit (<https://www.nhvr.gov.au/safety-accreditation-compliance/national-heavy-vehicle-accreditation-scheme/voluntary-exit>)

Operators who wish to voluntarily exit the NHVAS scheme need to complete an *Exit from scheme/module(s)* application. This application must be signed by a company director or the individual who holds the accreditation.

The NHVR will send you correspondence confirming your removal from the scheme.

Scheme exit requirements

- **Return of certificate** - Operators must return or destroy their certificate of accreditation when exiting the scheme.
- **Removal of labels** - Operators must ensure that all labels are removed and destroyed. It is an offence to falsely claim accreditation through use of a label or any other means. Anyone who does so may be subject to a financial penalty in addition to other sanctions.
- **Vehicle inspection** - After exit from Maintenance Management Accreditation operators must ensure they meet their state or territory road transport authority's (<https://www.nhvr.gov.au/about-us/useful-links>) vehicle inspection or Certificate of Inspection requirements before they can use any of the vehicles on a road. We recommend operators make contact with their state or territory road transport authority for advice on registration requirements.
